Let the door become a "gentle transition" in the space, replicating the warm texture of natural wood, smooth textured decoration, and an integrated structure from door to top, resistant to impact and violent opening, transforming the "presence" of the door, allowing the door to naturally blend with modern light luxury, Chinese minimalist and other home decoration styles, becoming a continuation of spatial aesthetics, like "Jidun Guarding Home", building a physical security line for families.

With a century old heritage of outstanding quality, if other countries have created design theories, then Italy has shaped design concepts or pioneered a concept.
Personality combines rationality and sensibility, perfectly integrating ergonomics and artistic creativity.
The pursuit stems from a profound understanding of perfection, not limited to the production of high-end doors, but more importantly, tailored for your exclusive artistic living space - a fusion of nature, culture, art, and lifestyle, an ecological, natural, and elegant quality lifestyle!

Taking the meaning of "pure background color, beauty of rank characters", the minimalist brushstrokes outline the sense of entrance ceremony, blending the soft texture of light gray with the orderly vertical lines, embodying the ultimate pursuit of minimalist life. The matte light gray paint surface is delicate and soft, with a low saturation high-end texture. It abandons all redundant decorations and only uses vertical textures to outline the outline of the door body, showing order in simplicity, which is in line with the sharp tone of "less is more" in modern homes.
